SCOP according to norm
NEN-EN17645

Heat pump, Full Inverter technology, **available in 3 models** from 11 up to 22kW.

Unique and patented air flow management, maximizing the performance of the heat pump.

Energy-efficient way to extend the swimming season, with **COP up to 26,4** and **SCOP up to 11,76**.

Bluetooth connection with DURACLOUD App including:

- Dashboard for daily use
- Settings and configuration
- Import and export of parameters
- Software update of the heat pump

Space-saving installation.

- Compact design
- Sideways air blow-out
- Can be installed against the wall

Spa mode for DURA-H11i, changing all necessary settings to optimise performance for use with spas.

Ideal for 4-season use, including a bottom tray heater to prevent ice build-up.

Whisper-silent operation down to 19,2 dB(A).

Heating, cooling or both in automatic mode.

Titanium heat exchanger, **compatible with salt-electrolysis**.

NoFrost™, prevents the heat pump from freezing during winter.

FullFlow™, ensures maximum water flow through the heat pump.

Compatible with LINK Master, using the advanced **DuraNet Communication Technology***.

Compatible with LINK Controller using **RS485 connection**.

Required installation space

* **DuraNet Communication Technology**
Unique communication protocol over the power cable. Allows full control of connected Duratech products with a single cable.
