

La Sta-Rite VSe

THE LEGENDARY
STA-RITE/5P2R,
UPGRADED WITH VSE
INTELLIGENCE.

- ▶ **Lower energy bills**
with a reduced environmental footprint
- ▶ **Quieter daily filtration**
for better poolside comfort
- ▶ **Plug and Play**
effortless installation with proven
Sta-Rite reliability

La Sta-Rite VSe

THE LEGENDARY STA-RITE/5P2R, UPGRADED WITH VSE INTELLIGENCE.

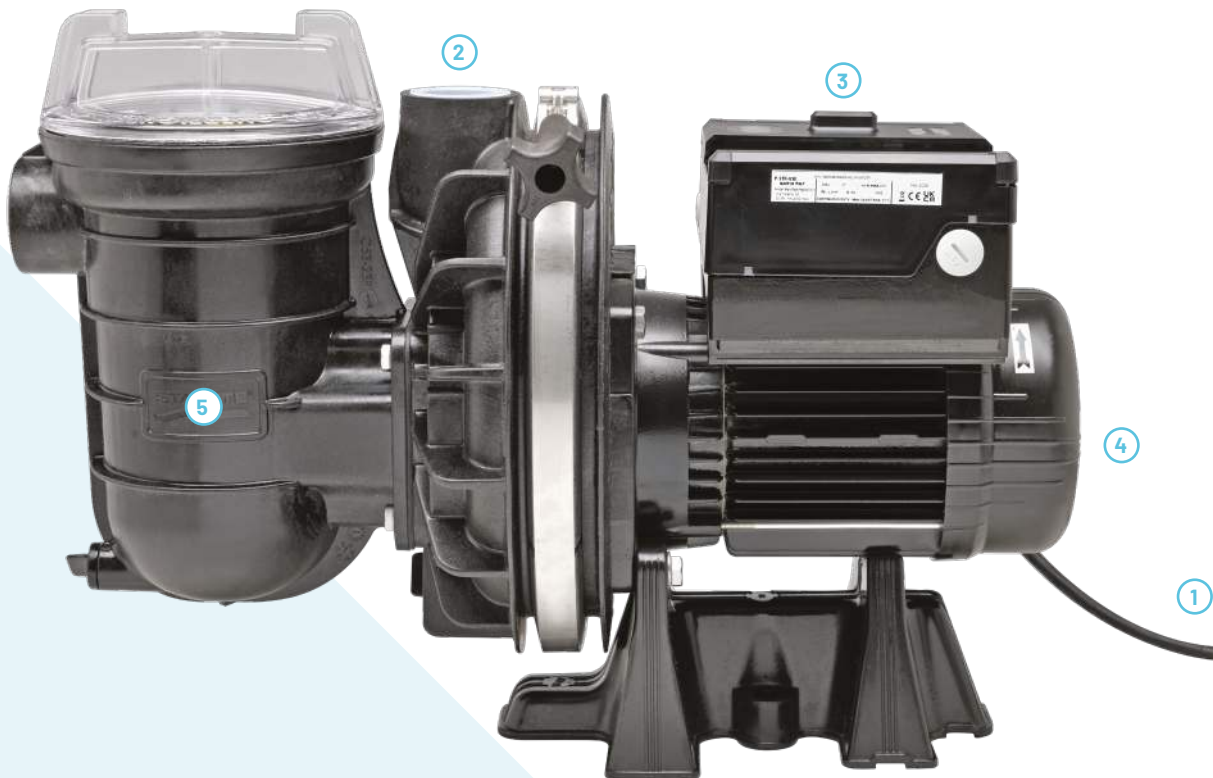

La Sta-Rite VSe brings variable-speed efficiency to the iconic Sta-Rite platform—delivering quieter daily filtration, smarter control, and a lower entry cost than premium variable-speed solutions.

Many pools spend most of their time doing everyday filtration—so **running at lower speeds for longer** is the smartest way to maintain water quality while cutting noise and energy costs, up to 55% with La Sta-Rite Vse.

PLUG AND PLAY, EFFORTLESS INSTALLATION WITH PROVEN STA-RITE RELIABILITY

Compact design that easily fits in small equipment areas, perfect for replacement of single speed 5P2R.

- 1 2m power cable with Schuko Plug.
- 2 50mm unions provided for easy connection specially to replace La Sta-Rite / 5P2R.
- 3 Embedded Timer for simple daily programming.
- 4 Speed ranges from 20% (600 rpm) to 100% (3000 rpm).
- 5 Proven Sta-Rite hydraulic platform with long standing reliability.

QUIETER DAILY FILTRATION FOR BETTER POOLSIDE COMFORT

Silent operations with only 44dB at 1400rpm.

Low speed variable operation designed for silent performance.

Improved water quality through longer, quieter run times.

With the **Quick Clean function**, the pump can easily be run at high speed for X hours for shock or cleaning purposes, returning to its standard schedule after this time period.

1400 rpm
44dB

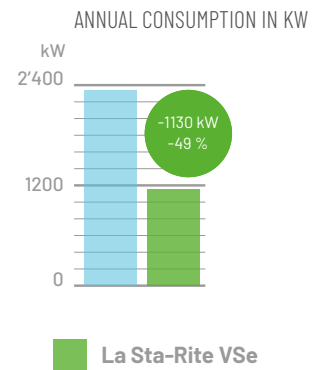

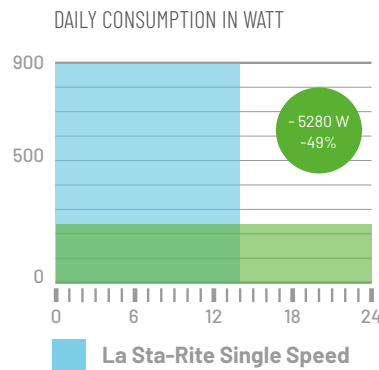

ENERGY SAVINGS

50 m³ pool

Let's compare the consumption of a standard La Sta-Rite ¾ HP pump that will run for 12 hours and a La Sta-Rite VSe pump that will run for 24 hours but at a lower speed.

What are the possible savings of a variable speed pump? Check our [Energy Savings Calculator](#)

BUILT ON PROVEN RELIABILITY

Built on the proven hydraulics of the Sta-Rite 5P2R, trusted for over 40 years and installed in thousands of pools across Europe, the new Sta-Rite VSe brings Pentair's long-standing reliability into a new generation of variable speed performance.

20 years of variable speed expertise

A pioneer in pool variable speed technology, Pentair is recognized worldwide for quality, reliability, and proven energy-saving performance.

Designed for the European market

Developed and assembled in Italy, the Sta-Rite VSe is ideal for both new pools and replacement projects, supporting today's more compact, user-friendly, and eco-responsible pool designs.

LOWER ENERGY BILLS WITH A REDUCED ENVIRONMENTAL FOOTPRINT

Smaller carbon footprint over the product's entire lifecycle.

Variable speed enables efficient daily filtration with lower energy use.

Designed and assembled by **Pentair in Pisa, Italy.**
